

No. 28 List of minimum recommended spare parts for auxiliary steam turbines driving electric generators for essential services of ships for unrestricted service

(1990,
Corr.)
(Rev.1
Nov
2006)

Item	Spare part	Number recommended
1. Turbine shaft	Carbon sealing rings, where fitted, with springs, for each size and sealing rings type of gland, for one turbine	1 set
2. Oil filters	Strainer baskets or inserts, for filters of special design, of each type and size	1 set
<p>NOTES</p> <ol style="list-style-type: none"> 1. The availability of other spare parts should be specially considered and decided upon by the Owner. 2. It is assumed that the crew has on board the necessary tools and equipment. 3. When the recommended spares are utilized, it is recommended that new spares are supplied as soon as possible. 4. Where the number of generators of adequate capacity fitted for essential services exceeds the required number, spare parts may be omitted.
