

CC3 Interpretation of paragraph 4.11.2, BCH Code

(1977)
(Rev.1
Feb
2007)

(corresponds to paragraph 15.14.4 of the IBC Code)

Paragraph 4.11.2 of the above Code reads as follows:

'Connections for returning the expelled gases ashore during loading should be provided.'

This paragraph may be interpreted as follows in respect of the provision of a stop valve for the connection of tank venting systems with lines for the return of vapours to shore plants:

'Tank venting systems should be provided with a stop valve for vapour return line to shore.'
