

SC146 Fire hose couplings and nozzles

(May
1999)
(Rev.1
Nov 2005)

(Reg. II-2/10.2.3)

SOLAS Regulation Chapter II-2/10.2.3 address the requirements of fire hoses and of the fixed low-expansion foam fire-extinguishing systems in machinery spaces respectively.

Interpretation

Aluminium alloys may be used for fire hose couplings and nozzles, except in open deck areas of oil tankers and chemical tankers.

Note: This UI SC 146 is to be uniformly implemented by IACS Members and Associates from January 2000.
