

S13 Strength of Bottom Forward in Oil Tankers

(1993)
(Rev.1
1993)
(Rev.2
May
2010)

S13.1 General

For every oil tanker subject to Regulation 13 of MARPOL 73/78 Annex I, the strengthening of bottom forward is to be based on the draught obtained by using segregated ballast tanks only.

This UR does not apply to CSR Oil Tankers.

S13.2 Scantlings

Determination of scantlings to comply with the above requirement should be based on the Rules of individual Societies.

Note:

Mandatory implementation date of the unified requirement is the 1st July 1994.
(This note was adopted by IACS Council on 2nd December 1993).
